

Discussion

As source control and to facilitate working together remotely, GitHub was used to store our work. Each time we worked, both team members were present.

Chris did the initial set up of the repo, program input/output, and the pthread methods (1 and 2)., Brian handled the implementation of the last method and handled testing/fixing logic errors where they occurred.

Commit Log:

Commits on Mar 16, 2021
Part 3 additional comments
@brianworks

Part 3 complete and check subgrid fixed
@brianworks

Commits on Mar 15, 2021
Part 3 in progress
@brianworks

Commits on Mar 14, 2021
method 2 implemented

@chrisjenson

method 1 implemented

@chrisjenson

added functions for checking rows, columns, and grids

@chrisjenson

Commits on Mar 11, 2021

Adding time and different solving methods

@chrisjenson

Commits on Mar 8, 2021

Add files via upload ...
